

Top Lever Springs

Perazzi has changed the design of the Top Lever Spring and Top Lever Lock Piece several times. The table below shows some versions that have been used in the past.

Perazzi Top Lever Springs			
	Current Model	Old Model	Old Model
Lock Piece Dia (in)	0.255	0.295	0.255
Lock Piece Length (in)	0.705	0.74	
Top Lever Spring Dia (in)	0.170	0.213	0.155
Top Lever Spring Length (in)	0.93	1.16	

We currently stock the 0.170" and 0.213" diameter springs and the lock pieces for those springs. The spring sizes will be in the part description. The 0.155" diameter spring is very rare as well as the oldest version with a straight and a conical spring used in combination.

Where possible, we recommend upgrading the locking piece to the new version so Top Lever Springs will be available in the future.
